TUSCARAWAS COUNTY GENEALOGICAL SOCIETY

INTRODUCTION

Last year, the Tuscarawas County Probate Court gave the Tuscarawas County Genealogical Society custody of many of the original probate dockets. We were greatly surprised to find among them, three volumes of the original, handwritten, death records. For many years, we had feared these original records had been lost or destroyed. These three volumes cover a time period of 1867 to 1908. These original records differ in many respects than the transcibed ones, most of us are used to viewing.

We have prepared a new index for each of these volumes. The index was carefully typed and proofread. We did not change or correct any mispellings from the original records, but left them as originally recorded. We have copied the original book pages so that you can be the judge of what is recorded.

Sometimes, no first name was listed on the original record. We checked to see if it was a child and recorded the first name as "infant" in the index. When it was not an infant the first name is listed as "no name".

Each original death record was recorded across two pages that were side by side. The page numbers in the index, refer to the page numbers in the upper righthand corner of the page on the righthand side.
